

H2GO

hybrid-electric hydrogen vehicle

Fuel cell inside

Zero carbon, zero batteries ... lots of fun!

The H2GO is the result of 5 years of research and development in next generation energy technology

This battery-free toy car is a real-working model scale version of laboratory vehicles running on renewable and zero emissions hydrogen fuel.

Welcome to the hydrogen age!

Powered by
Horizon

H2GO

hybrid-electric hydrogen vehicle

The H2GO is a hydrogen electric hydrogen vehicle that combines fuel cells for cruising power and super-capacitors for speed. The result: a fast moving remote control car where even the remote does not need any batteries!

Zero carbon, zero batteries...lots of fun!

H2GO

hybrid-electric hydrogen vehicle

Fuel cell inside

Solar panel

- provides power to the refueling station
- charges the car's super-capacitors
- charges the controller

Remote control

- right, left, back, forward
- speed booster button

Refueling unit

- Draws Hydrogen from ordinary water
- Is powered by the Solar Panel or AC.

A high-tech refuelable toy car that runs on sun and water!
